

ShinMaywa

Submersible Pump for Wastewater Treatment <C/A/S3> Series

**Select the installation type and the impeller type to meet the conditions of use.
You can choose the best pump from a wide variety of models.**

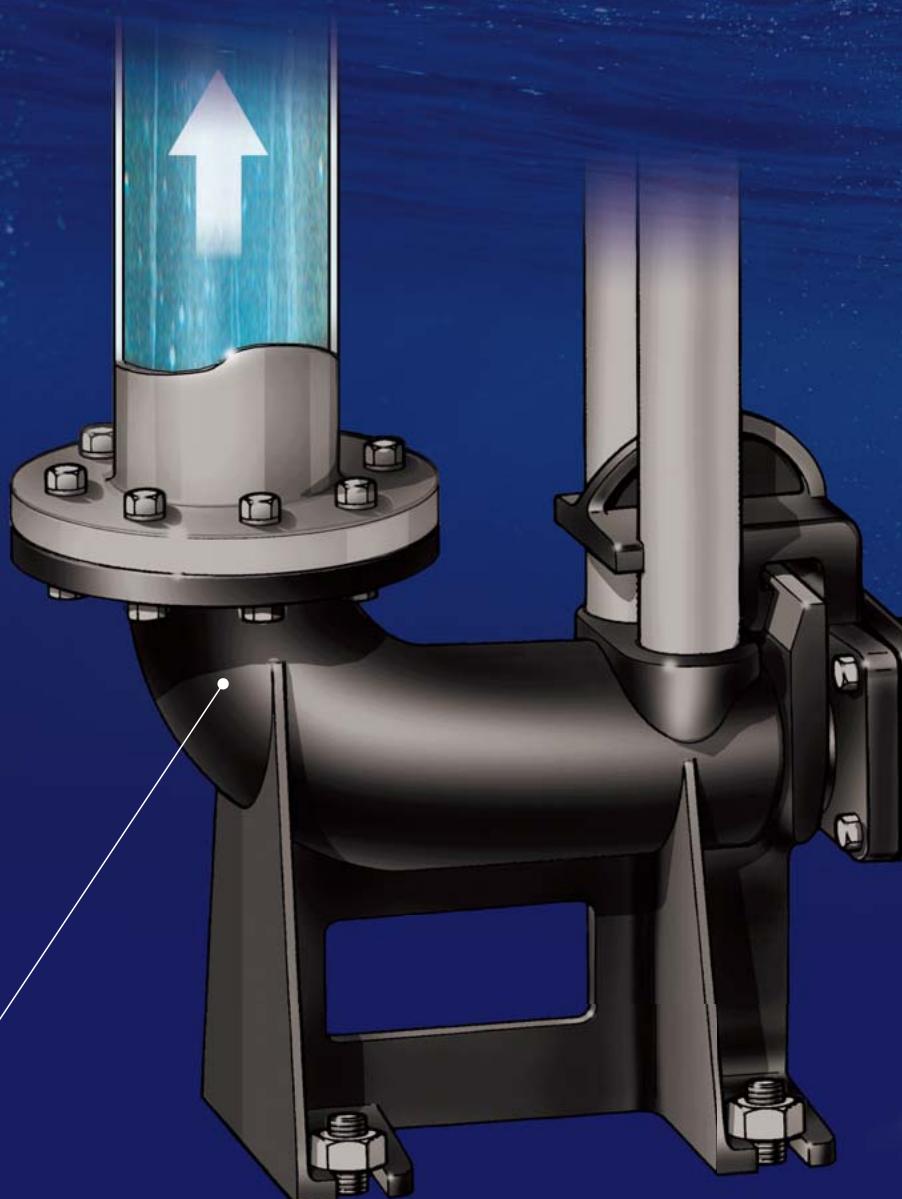

Extensive Lineup to Meet a Wide Range of Needs.

ShinMaywa C/A/S3 series submersible pumps for wastewater treatment permit selection of the installation type and the impeller type to meet the conditions where they are installed. Installation types include the guide rail installation type and the free standing type. Impeller types include the multi-vane semi-open impeller, channel impeller, vortex Impeller, screw impeller, and chopper/grinder mechanism type. The lineup also includes series such as "non-clog scroll submersible pumps," which feature high pump efficiency and high solid passage capability achieved by a newly developed impeller and pump housing that saves energy and reduces maintenance cost, and lightweight "NORUS submersible pumps" made of high-functional resin and stainless steel. Select the best pump to meet your needs.

* For the high pump efficiency and high solid passage capability "non-clog scroll submersible pumps" and high-functional resin lightweight "NORUS submersible pumps," refer to the separate catalogs.

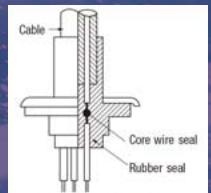

Discharge connection

The pump is automatically connected to the discharge pipe.

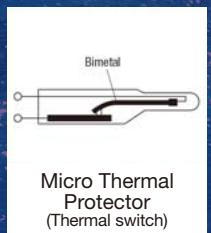

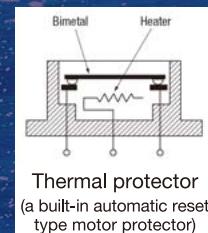

Cable entry with core wire seal

The core wire seal shuts the water out from penetrating into the motor through the core wire.

Motor protector

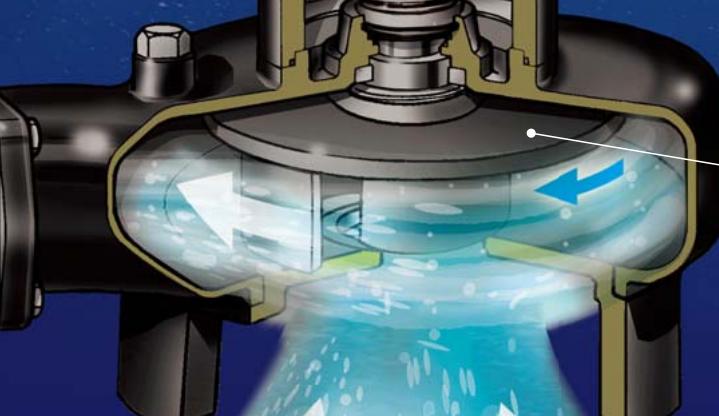

Thermal protector (a built-in automatic reset type motor protector) or thermal switches are embedded to the motor winding.

Air-filled submersible motor

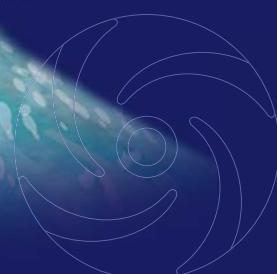

Shaft seal

A highly wear resistant double mechanical seal is employed. Besides, combined use of an oil seal further extends the life. (except for some models)

Impeller

Select the impeller suitable for your application.
Each impeller is dynamically balanced.

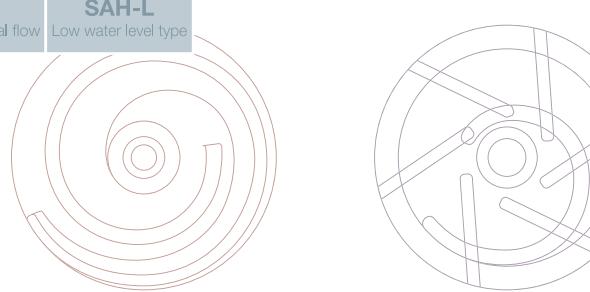

Complete Lineup of ShinMaywa Submersible Pumps for Wastewater Treatment

 indicate models that are featured in this catalog. For models that are not featured here, see the catalog and handbook for the model in which you are interested.

Stainless steel submersible pump																					

Impeller type

Channel impeller

Provides high pump efficiency is applicable to wide range of flow rates varying and discharge heads

Transferring or discharging sewage, sludge and wastewater containing a lot of uniformly shaped solids

- Treatment processes at various wastewater treatment plants
- Pump station in the sewage/wastewater collection system
- Effluent from building facilities as sanitary equipment
- Draining stormwater from roads or underpass
- Treatment processes at industrial wastewater treatment system
- Kitchen drainage, agricultural water supply/drainage and other general drainage

Chopper / Cutter / Grinder pump

Incorporates a mechanism to prevent solids clogging and tangling. The submersible grinder pump grinds solids.

Transferring or discharging sewage and wastewater containing solids

- As sanitary equipment and for effluent discharge from building facilities
- Pressure sewage system (submersible grinder pump)

Vortex impeller

Provides high solid passage capability, but not for high flow applications due to relatively low pump efficiency.

Transferring or discharging sewage and wastewater containing fibrous material

- Pump stations in the sewage/wastewater collection system
- Transferring and discharging sludge and scum from industrial wastewater treatment system
- Transferring and discharging sludge, wastewater containing solids from food processing plants and dairy farms
- For raw water/equalization tank at night-soil treatment plants
- For raw water/equalization tank at onsite wastewater treatment system

Screw impeller

Provides high pump efficiency and high solid passage capability. The screw effect makes it suitable for transferring highly concentrated sludge.

Transferring or discharging sewage and wastewater containing uniformly-shaped and fibrous material

- Transferring or discharging wastewater containing debris and sludge from various processes of wastewater treatment plants
- Pump station in the sewage/wastewater collection system
- Domestic wastewater from household, apartments or commercial buildings

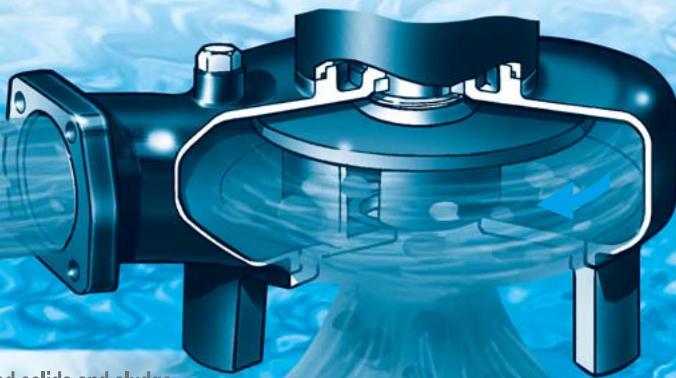

Multi-vane semi-open impeller

Provides high pump efficiency and achieves high head at low power

Transferring or discharging fresh water or wastewater containing less suspended solid

- Defoaming, backwashing or filtering at onsite wastewater treatment systems
- Discharging treated water from sewage treatment plants or onsite wastewater treatment systems
- Simple agricultural or gardening use
- Draining stormwater, sewage water or spring water
- Draining stormwater or spring water from underpass or tunnels
- Effluent from buildings, factories, garages or basements

Channel impeller

For sewage and wastewater containing a large amount of uniformly shaped solids and sludge
Applicable to a wide range of flow rates varying and discharge heads

* The starting method is direct-on-line. [] indicates the impeller number.
Note: Please inform us of the pump model and installation kit number.

Cable specifications

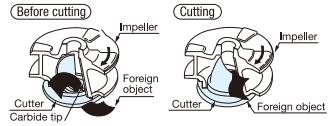

● 3.7/4.5kW: 2PNCT 3.5mm²×4cores outer dia.Φ14.5mm 8m

● 5.5/5.9kW: 2PNCT 5.5mm²×4cores outer dia.Φ17 mm 8m

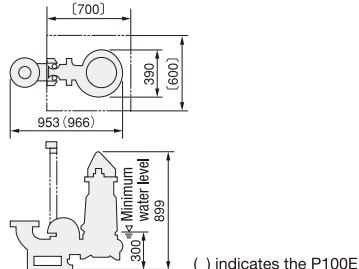

* VCT: PVC insulated PVC sheathed cable

Cutting mechanism

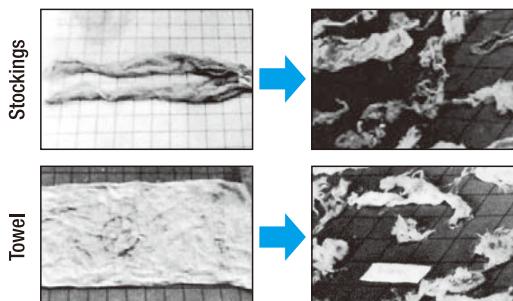

The pump transfers wastewater while cutting foreign objects with a carbide tip mounted to the suction port side of a single-vane channel impeller and a cutter mounted to the suction port.

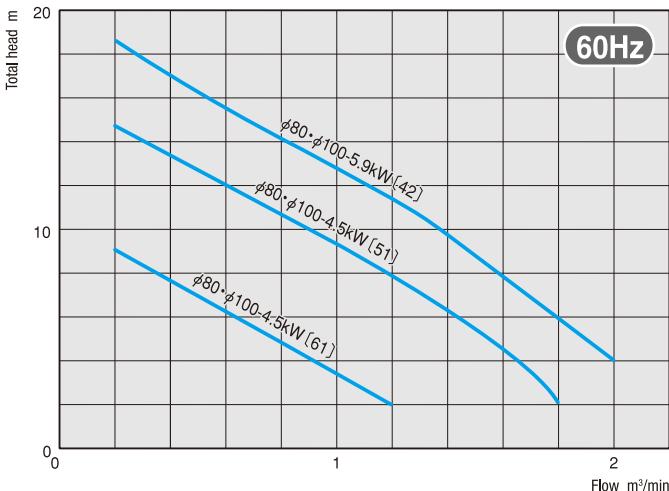

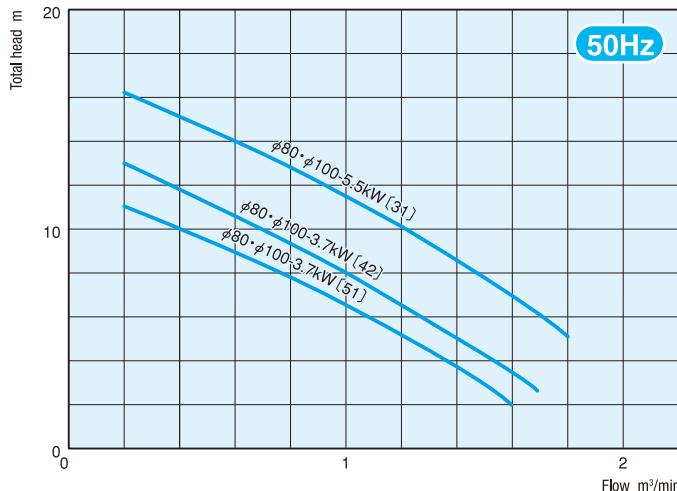

Dimensions (Unit:mm)

Cutting sample (with scale intervals of 5 cm)

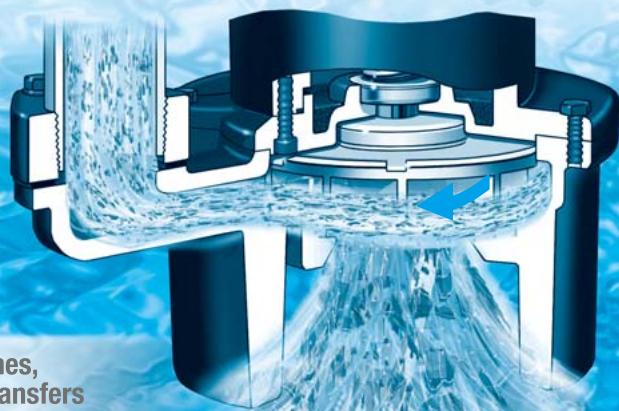

Performance Curves

* For detailed performance and dimensions, please contact your dealer or visit www.shinmaywa.co.jp/pump/english/.

Submersible Grinder Pump

Grinder pump capable of grinding solids

This submersible pump can grind foreign objects, such as clothes, rubber products, and plastic bags/sheets in wastewater, and transfers wastewater through narrow pipes over a long distance.
Most suitable for a pressure sewage system.

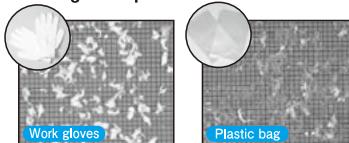

CKM

Grinder pump

The pump grinds solids in wastewater to 5 to 10 mm particles with a strong grinder mechanism and pumps wastewater.

Cutting Example

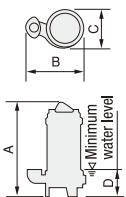

* The square size is 5x5mm.

10.4 to 3.7kW

Performance Curves

Stainless steel submersible pump

The pump uses stainless steel in all wetted parts.
Suitable for discharging wastewater from food plants, hospitals, and laboratories.

Corrosion Resistance Classification Table

Chemicals	Chemical symbol	Concentration % (Wt)	Temperature (32°C or less)	Remarks
			304 stainless steel	316 stainless steel

		5 to 25	▲	●
		25 to 50	—	●

● Corrosion at 0.1 mm/year or less. ▲ Corrosion at 0.1 - 1.0 mm/year.

Note 1. Be alert to the risk of intergranular corrosion.

Note 2. Be alert to the risk of pitting corrosion.

Note 3. Be alert to the risk of stress corrosion cracking.

* Pumps made of 316 stainless steel are also available as an option

High efficiency

Multi-vane semi-open impeller

S3A

Smooth solid handling

Channel impeller

S3N

Large passage area, prevent tangling

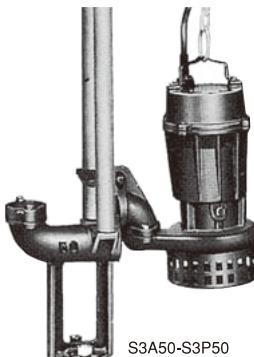

Vortex impeller

*1: The float switch is only used for auto operation and auto-alternate operation models.

*2: Two cables. One is for motor power and the other is for protector signal.

*3: Three cables. Two are for motor power and one is for protector signal.

*4: The stand and suction pipe are integrated.

*5: The starting unit comes as standard only with CKM32HS (single-phase 200 V). Be sure to install the starting unit for a single-phase pump before starting operation.

● For changing the voltage, extending cables, or changing parts material, please contact us or your dealer.

★ indicates that the companion flange is built into the pump.

Lineup of ShinMaywa's Submersible Pumps for Wastewater Treatment

* For details, please request a separate catalog.

CNX

High Efficiency and High Solid Passage Capability

Non-Clog Scroll Submersible Pump

Solid size: 100% of discharge size
Discharge size: 50 - 100 mm
Rated output: 0.75 - 7.5 kW

CN (Large-sized)

Channel Impeller Type (Large Size)

Forced-cooling

Discharge size: 200 - 800 mm
Rated output: 7.5 - 250 kW

Natural-cooling

Discharge size: 200 - 400 mm
Rated output: 7.5 - 45 kW

CNX

3-inch Solid Pass-through Type

Closed-loop cooling

Discharge size: 150 - 300 mm
Rated output: 11 - 37 kW

Natural cooling type

Discharge size: 150 - 300 mm
Rated output: 5.5 - 37 kW

Submersible Mixed and Axial Flow Pump

SD・SA

Discharge size: 300 - 1,000 mm
Rated output: 11 - 150 kW

CR・CRS・CRC

norus

Lightweight Submersible Pumps NORUS

Discharge size: 32 - 80 mm
Rated output: 0.1 - 2.2 kW

NORUS series submersible pump offers three advantages: toughness, lightweight and corrosion resistance in combination with highly functional resin and stainless steel.

CNF・CVF・CWF

Submersible Pump with Flywheel

CNF Channel Impeller Type

Discharge size: 80 - 500 mm
Rated Output: 5.5 - 75 kW

CVF Vortex Impeller Type

Discharge size: 80 - 150 mm
Rated Output: 5.5 - 22 kW

CWF Screw Impeller Type

Discharge size: 80 - 150 mm
Rated Output: 5.5 - 22 kW

FP

Floating Pump

Discharge size: 50 - 80 mm
Rated output: 0.75 - 1.5 kW

For gate use SAH

Discharge size: 300 - 800 mm
Rated output: 7.5 - 75 kW

For low water level SAH-L

Discharge size: 400 - 900 mm
Rated output: 7.5 - 90 kW

* Technical Standards (draft) and Commentaries for Pump System developed by the Association for Pump System Engineering

**Liquid level control equipment -
All models are of an environmentally-friendly no-mercury structure.**

LC

Level regulator

Useful for potable water, wastewater and sewage containing suspended solids.
Strong for corrosion or rust even when immersed in a corrosive liquid.

MS

Mini switch

Useful for wastewater and sewage containing a few suspended solids.
The MS is available in two types, MS11 (single float) and MS21 (double float).

FV

Oval float

Useful for fresh water as well as wastewater not containing suspended solids.
A single FV can control both the upper and lower liquid levels.

ShinMaywa Pump Selector

ShinMaywa Pump Selector provides you to make easy selection from variety of ShinMaywa pump products to meet your application. You can get pump selection and datasheet (specifications and performance curve) easily. In addition to datasheet, you can also get technical information for selected pump including catalogue, drawings, CAD data, etc. through ShinMaywa Product Data Download system seamlessly. Using ShinMaywa Pump Selector, you can make your decision quickly and make smooth communication with our sales representatives.

[Note] Please contact to our sales representatives for confirmation prior to place the order of ShinMaywa Pump products.
